(57) Abstract:

PROBLEM TO BE SOLVED: To provide a remote control method by which even an unskillful person on device control can easily handle the device.

SOLUTION: A user uses a paragraph selection section 3 of a remote controller 1 to select a proper paragraph and depresses an enter button 4 to determine the paragraph. A generated sentence display section 5 displays the determined paragraph. The generated sentence display section 5 displays connected paragraphs as a sentence under creation by repeating the operations above. When the sentence is completed, a paragraph display section 2 displays a message of 'transmission', and when the user depresses the enter button 4, a command is transmitted to an operation object device to control the device located at a remote place.
